TOP 5 THINGS YOU NEED TO KNOW

A Shimano group ensures the quickest, most reliable shifts every time, all the time. The Comp's 27-speed Rapid Fire Plus shifting drivetrain with Shimano M371 48/36/26 crankset, new Acera M3000 rear & front derailleurs and 11-34 cassette offers a much larger gear range, with much lower gearing, for easier hill climbing than standard or compact double chainring road and street bikes.

Our ATS adjustable-height steering system is much lighter than traditional angle adjustable stems, and offers a much faster and easier method for adjusting handlebar height for more efficient and comfortable riding.

Vittoria's Randonneur 32c tires offer more air volume & a larger footprint to make for a more comfortable & stable ride. They also offer increased puncture resistance thanks to a Double Shielding casing and reflective sidewalls for enhanced visibility at night.

Tektro's V-brakes offer plenty of stopping power (and plenty of room for the addition of fenders) with a modulator in front to ensure controlled braking.

The sealed cartridge bottom bracket & sealed headset offered on Coda Comp improve performance and reduce maintenance.
