TOP 5 THINGS YOU NEED TO KNOW

The RST Gila suspension fork delivers coil-sprung suspension travel with an MCU elastomer bumper that smoothes fork bottom-out. With a lightweight alloy crown and lowers and stout 28.6mm steel stanchions for stiffness, strength and a straight-tracking front wheel, this fork will deliver ride after ride.

The 21-speed Shimano EZ-Fire Plus drivetrain features a Shimano TX35 rear derailleur, alloy 42/34/24 crankset & Shimano SIS 14-34T freewheel for smooth shifting, easy climbing & secure descents.

Not so long ago, V-brakes were the most powerful bike brakes known to man. Then disc brakes came along. No biggie. V-brakes will still lock up your wheels & stop you safely. And they don't weigh as much as discs!

Every Trail X offers quick release front & rear wheels and a quick release saddle assembly to make transport, storage, or locking up a snap.

The Jamis ATB Sport series saddle features front & rear protective guards to offer plenty of durability, style & comfort.
